

BEING CO-CREATED

Every estate has its own DNA.

BLOCK-iQ is the wider layer around the lease: buildings, components, obligations, people, money, evidence and decision history.

The Estate DNA model connects the evidence around a live decision. It does not reduce a building to a generic compliance score.

START WITH THE DECISION

01 | DECISION

A major repair, missing record, disputed charge or board decision that needs settling now.

02 | EVIDENCE

Connect what it depends on.

The lease spine, building facts, money, accountable people and previous decisions.

03 | WORKFLOW

Automate the repeatable route.

Preserve the source, decision owner, open uncertainty and handover record.

NOT A FINISHED PRODUCT CLAIM

BLOCK-iQ is not offered today as a public compliance system, safety verdict or finished estate-management platform.

USEFUL CO-CREATION CASE

Bring one live building decision and the types of record it depends on. Do not send building records with the first enquiry.

Bring one building decision.

Registration is not product access, a compliance assessment or a commitment to buy.
